Where inspiration becomes insight

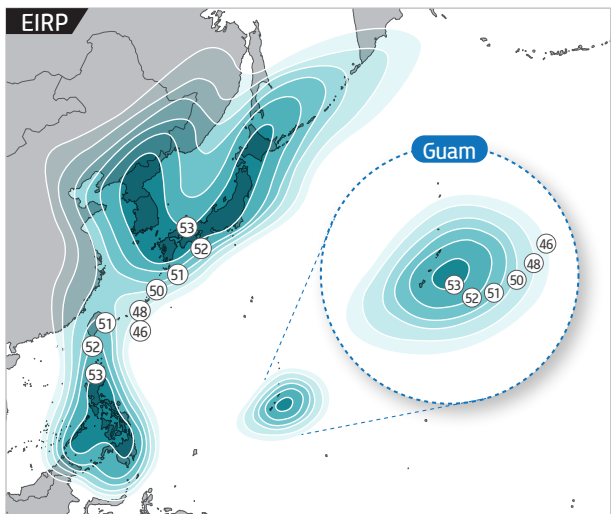

# SATELLITE FLEET

## KOREASAT-5A

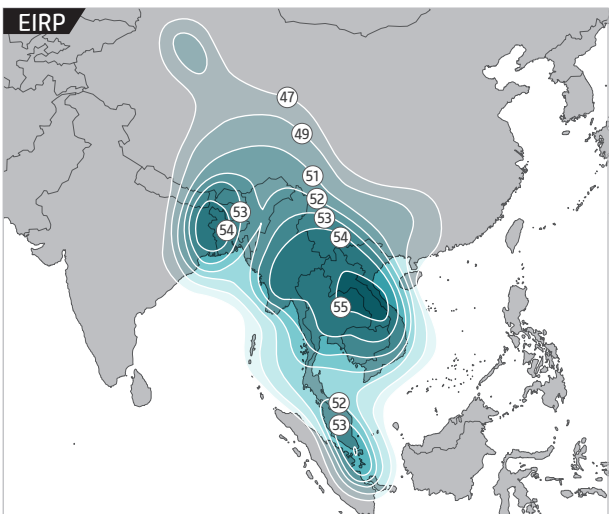

Orbital Location : 113°E  
Launch Date : Oct 2017

Manufacturer : Thales Alenia Space  
Launcher : SpaceX

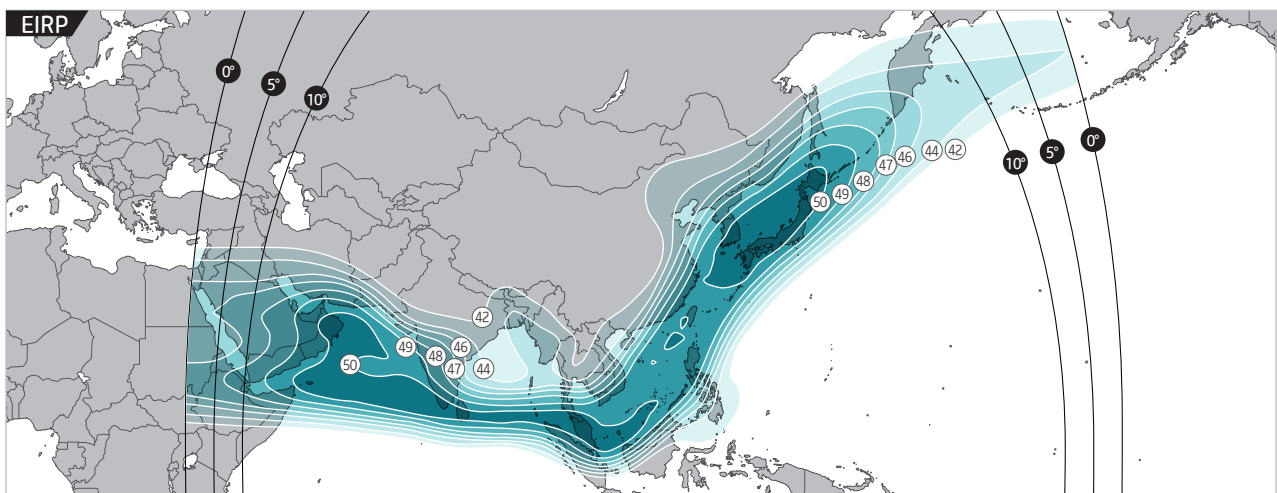

North East Asia Ku-band Beam

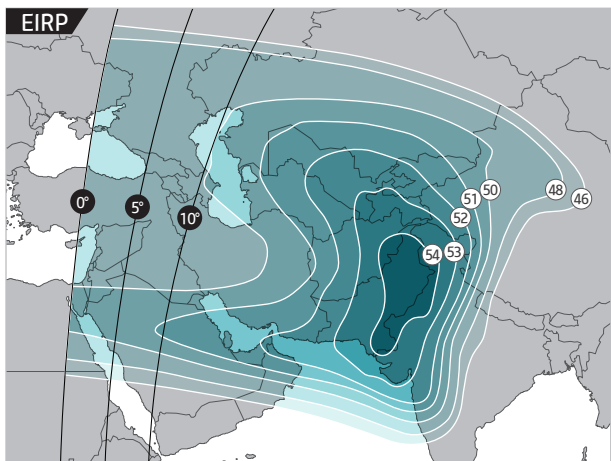

Indochina Ku-band Beam

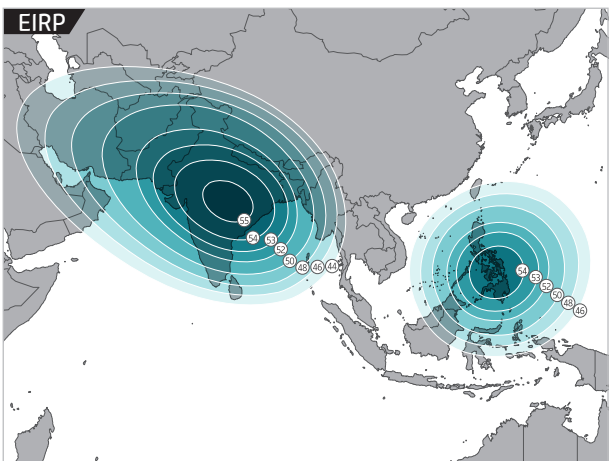

Maritime Ku-band Beam

South Asia Ku-band Beam

Steerable Ku-band Beam

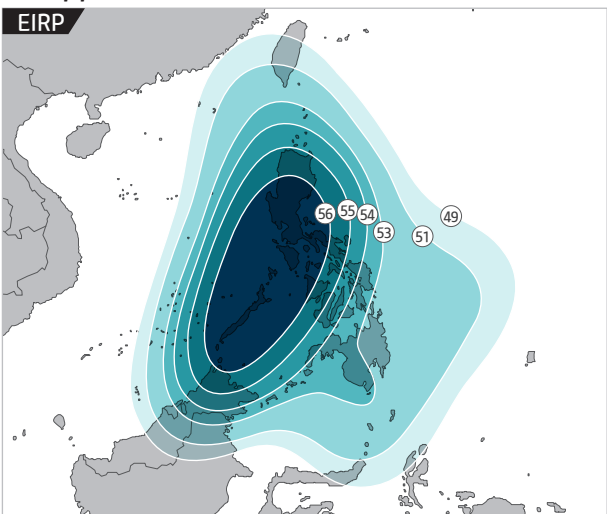

# SATELLITE FLEET

## KOREASAT-7

Orbital Location : 116°E  
Launch Date : May 2017

Manufacturer : Thales Alenia Space  
Launcher : Arianespace

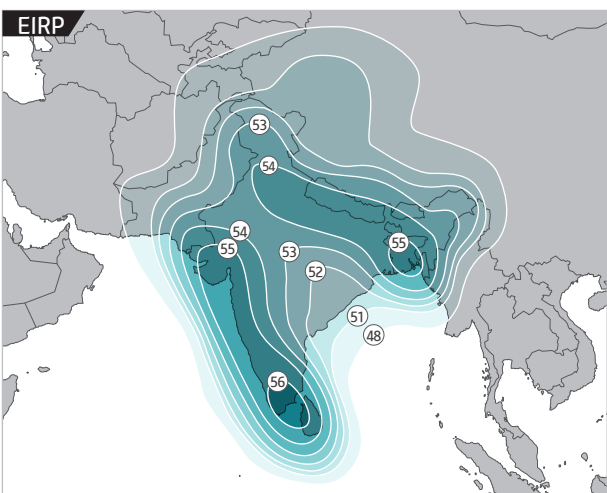

Philippines Ku-band Beam

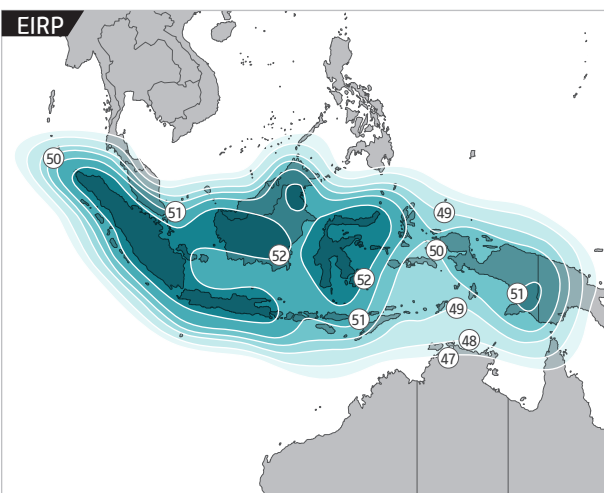

Indochina Ku-band Beam

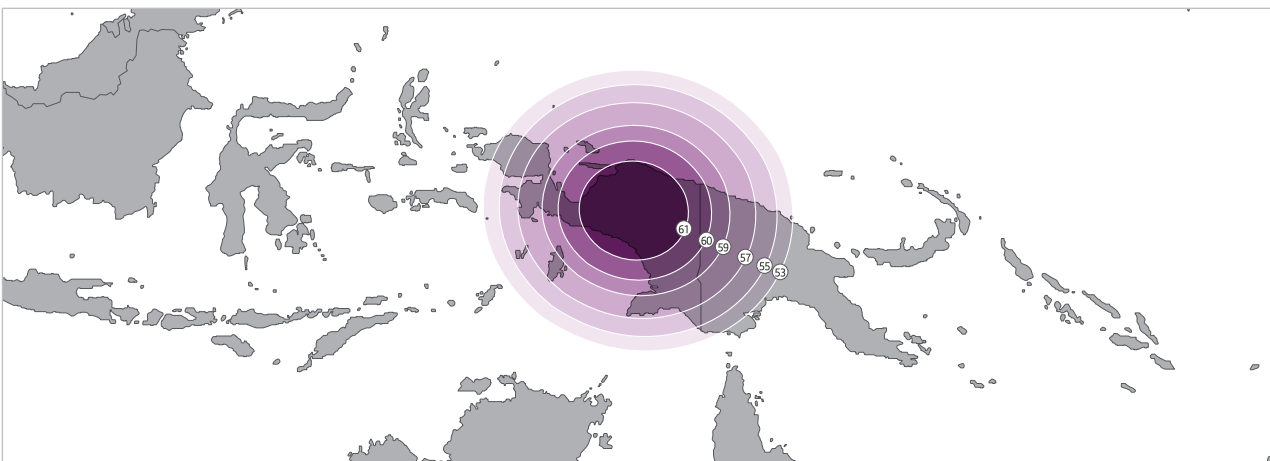

India Ku-band Beam

South East Asia Ku-band Beam

Steerable Ka-band Beam

## KOREASAT-6

Orbital Location : 116°E  
Launch Date : Dec 2010  
Manufacturer : Orbital Sciences Corporation  
Launcher : Arianespace

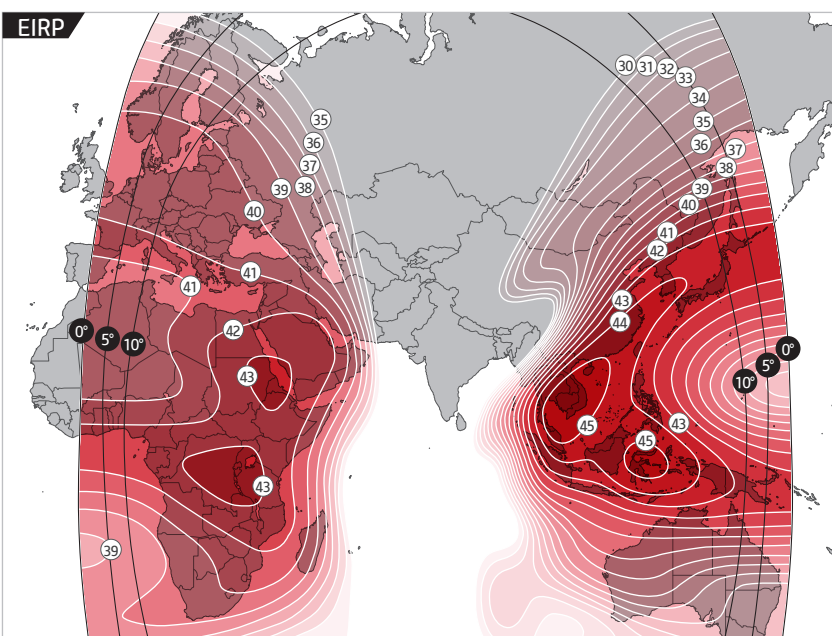

FSS Ku-band Beam

## KOREASAT-8

Orbital Location : 75°E  
Launch Date : Feb 2014  
Manufacturer : Space Systems/Loral  
Launcher : Arianespace

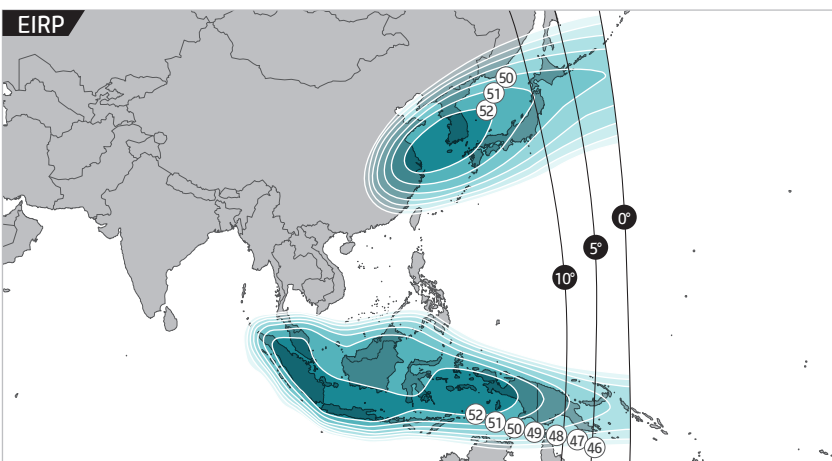

West Hemi C-band Beam

East Hemi C-band Beam

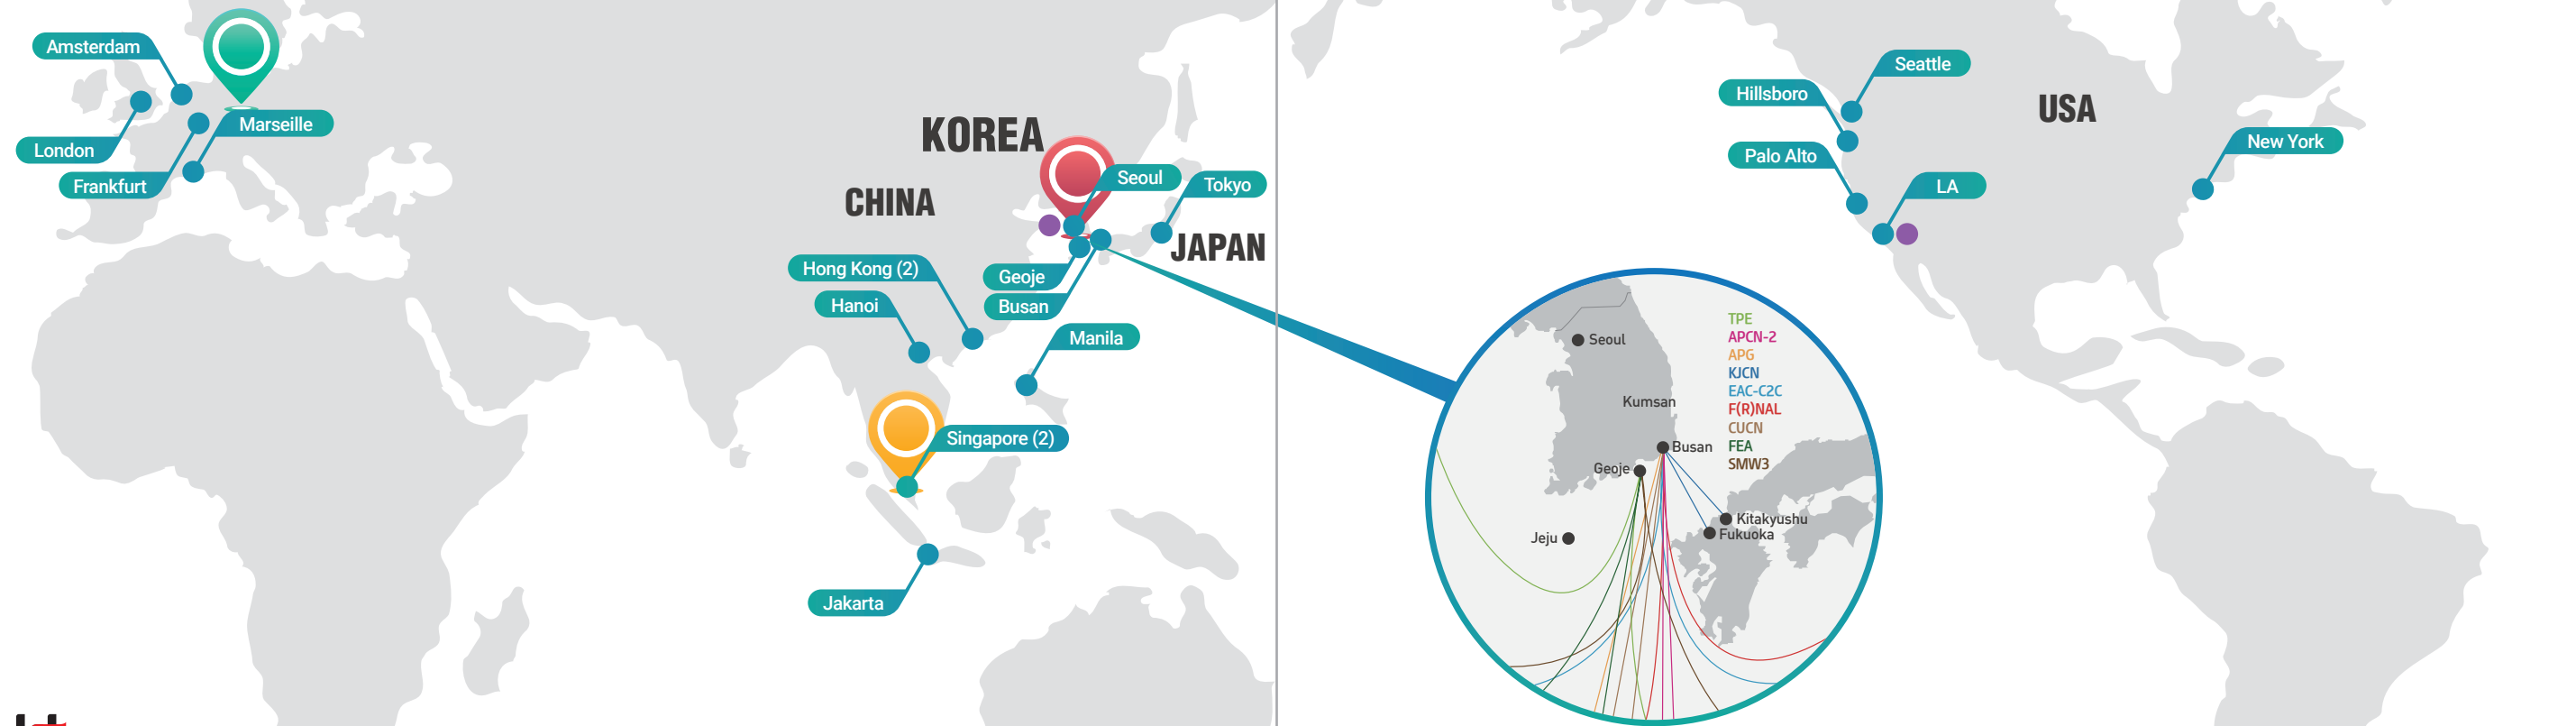

SEA / Korea Ku-band Beam

# TELEPORT & MANAGED SERVICES

## Global Network Infrastructure

Customers can benefit from KT SAT's 50-year-experience managed services from our most strategically located teleports.

## kt Korea Telecom Group Resources

- ▶ **IPLS**
  - Global end-to-end connectivity including backhaul and local loops
  - 14 Global PoP locations (LA/NY/PAL/LDN/FFT / HNO / SGP / JKR / MNL / HK / TKY & etc.)
- ▶ **Global IDC & Managed Hosting**
  - IDC bundled solutions with co-location, hosting and bare metal
  - Direct Internet access to domestic & global major ISPs
- ▶ **Submarine Cable Capacity**
  - Cable system in possession (APCN-2, KJCN, SMW-3, TPE, APG, NCP)
  - APG, NCP(Asia) NOC Operator
  - Operating cable landing Stations in Korea : Busan, Geje

## Teleport Locations

- 📍 Kumsan Satellite Service Center
- 📍 Yongin Satellite Operation Center
- 📍 Cheonan NGSO Teleport
- 📍 Singapore Service Teleport
- 📍 Germany Service Teleport

## Service Use Cases

### Slot Leasing & Hosting

- Platform by KTSAT or customer, operated by customer
- Reducing CAPEX while maintaining security

### Platform Hosting

- Customer-owned platform, operated by customer
- Suitable for high-security or big-size existing networks

### Customized Managed Services

- Service scope and structure is fully customizable, from platform provision, ownership to operation etc.

### Fully Managed Services

- End-to-end service including equipment and operation
- Customer can focus on its own business and end-users

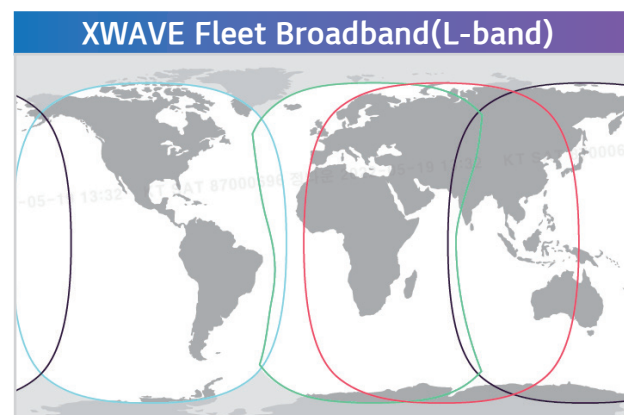

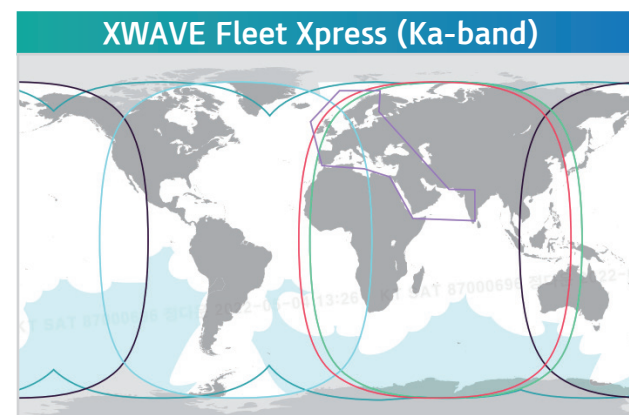

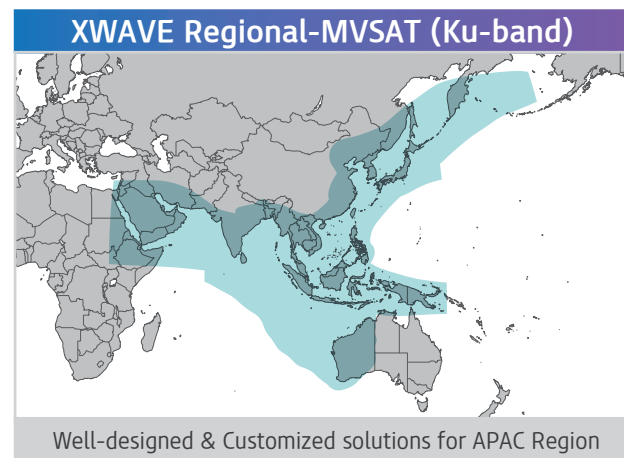

# MARITIME SERVICE

KT SAT provides end-to-end maritime connectivity services customized for all types of vessels. We launch our maritime brand XWAVE with the vision to lead the wave of change in maritime communications.

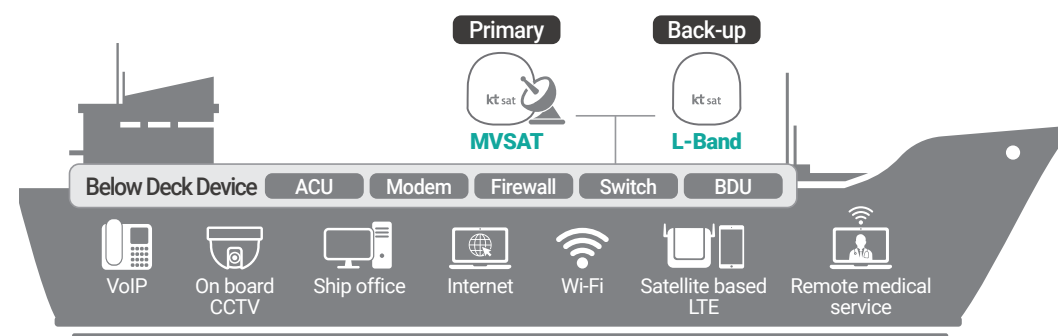

## XWAVE ∞ MVSAT

## XWAVE ∞ Solution

### • XWAVE Value-Added Solutions

- **Ship Office**  
Shipmail, Anti-virus, Blacklist/Whitelist, Web-filtering browser
- **Sea Black-box**  
Realtime/High-quality video recording  
Remote searching and playing of the videos
- **VoIP**  
High quality voice with QOS,  
Free extension call among user groups

### • XWAVE Vessellink

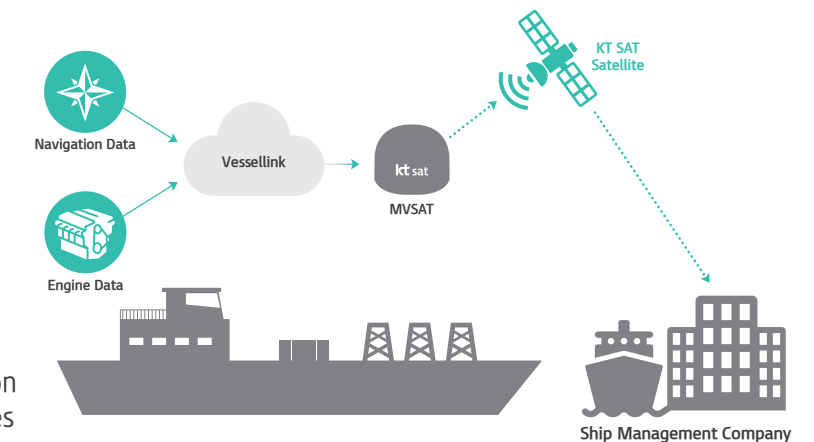

#### ► Key Features

##### For Ship

- Automated data reporting system
- Reducing fuel oil consumption based on data analysis
- Data verification system

##### For Shore

- Intelligent fleet monitoring system
- Marine weather forecast service
- Management of fuel oil consumption
- Vessel performance analysis services

### • XWAVE VNMS (Vessel Network Management Solution)

#### Fleet Tracking and Data Traffic Monitoring Solution

### • XWAVE APMS (Access Point Management Solution)

#### BYOD Data Solution for Seafarers' Communication

\* Bring-Your-Own-Device : BYOD

### • XWAVE LIVE Broadcasting

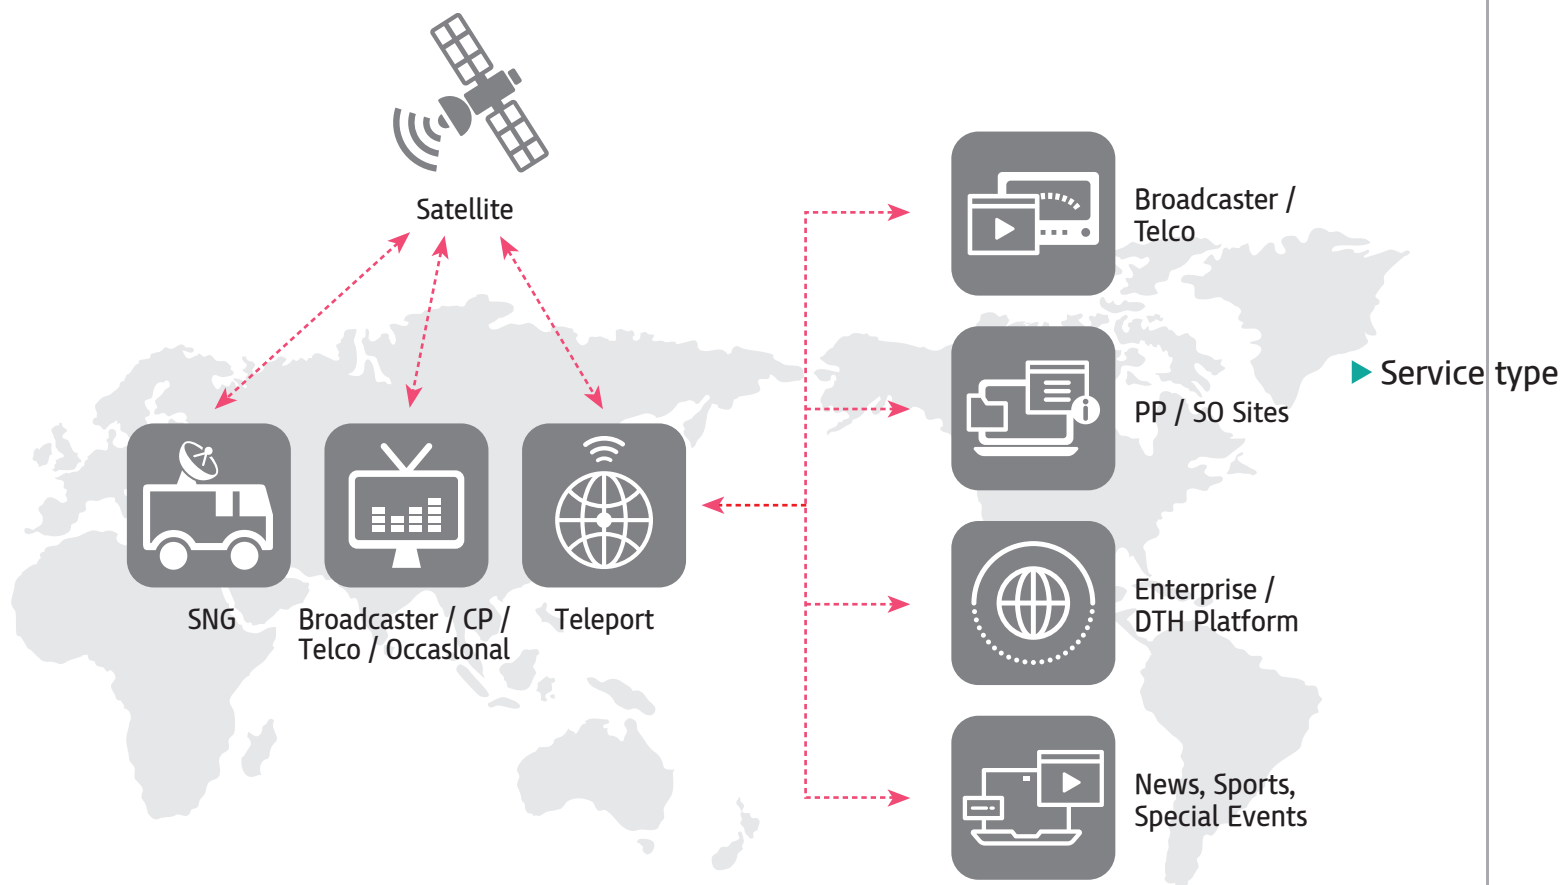

#### “ON Live!”

Watch live TV news on board 24/7.  
KT SAT delivers HD live broadcasting service to the customer using our maritime connectivity. No need to install additional TV antenna on board. As long as you have the connectivity you will be on-live.

# VIDEO SERVICE

KT SAT provides uplink / downlink service via satellite for various video contents, complemented by our 24-hour customer support from Kumsan Teleport.

## Broadcasting & Media Service

- Global Contribution and Distribution Service
- TVRO and DTH Platforms
- Occasional Use and SNG Service
- Turn-Around Service
- Fully redundant MPEG-2/4, HD/SD, DVB-S/S2/NS3, U/L and D/L systems
- 24/7 Customer Support

※ Kumsan Teleport

# DATA SERVICE

KT SAT provides customized data solutions through seamless satellite connectivity optimal for enterprises, governments and individuals across the world even in Antarctica.

## Premium VSAT Services

- Point-To-Point managed satellite solutions for voice, data and Internet service applications
- Guaranteed Committed Information Rate
- Access to global internet backbone and fiber network for seamless connectivity

## Broadband / Mobile Backhaul Services

- TDMA VSAT by iDirect
- Price Plan optimized to network size and customer demands
- SOHO network backup for private networks and mobile operators

## Additional Services

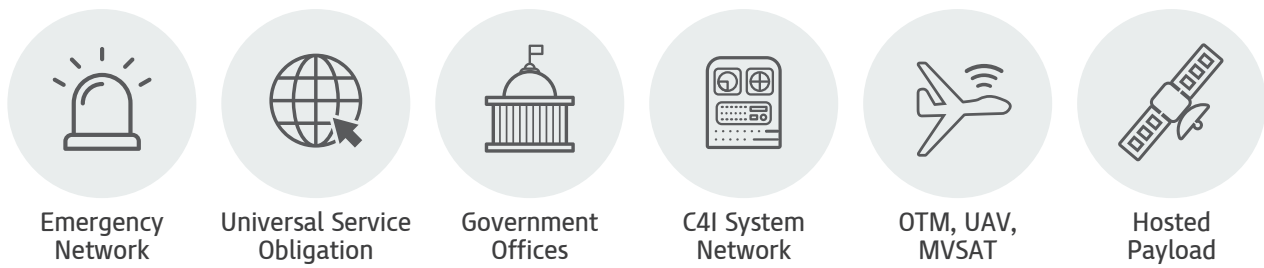

- VPN(Virtual Private Network), WAN Accelerator
- Video teleconference solution between HQ and remote sites
- Installation & consulting services for security, voice, and data solutions
- Cellular backhaul service for disaster and emergency

# GOVERNMENT & MILITARY SERVICE

Long-time experience in Government/Military total solutions from satellite services to system integration

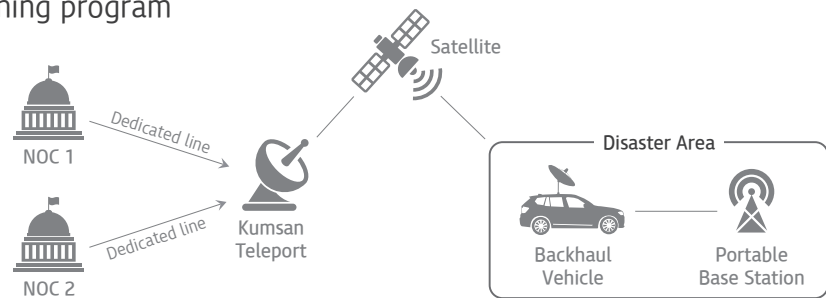

## Emergency Network

### Key Features

- Satellite capacity & teleport service (hub located in KT SAT teleport)
- Easy-to-deploy remote terminals : Fly-away antenna, modem, BUC, LNB, generator
- Maintenance and operator training program

### Value-added Solutions

- IP-Mesh
- LTE Drone Base Stations
- AR-based Medical Assistance

## Fisheries Monitoring & Management

### Infrastructure

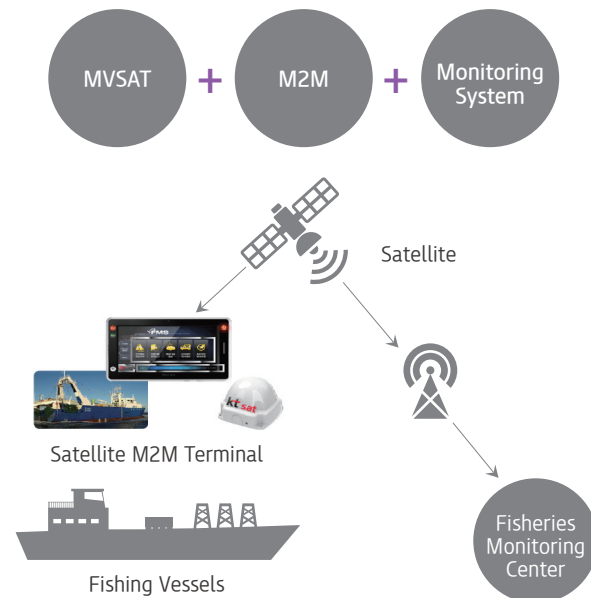

- Hardware : Servers, network equipment, alarms and consoles
- System Software : DBMS & WAS, operating software etc.

### System Integration

- Fisheries Monitoring : IUU & distant water vessels monitoring, illegal vessels detection & alarming, automatic reports
- Fisheries Monitoring Data Management : vessel info management,
- Fishing restriction areas data management, etc.

### Standardization & Security Solutions

- Standardized module-type system with guidelines
- Enhanced security through data protection, security guidelines, data encryption

# SPACE DATA

KT SAT provides customized Space Data, delivering insights for users prior to their decision making. To know, before you decide.

### Service type

Earth Observation Satellite Imagery	
<ul style="list-style-type: none"> <li>Both EO &amp; SAR imagery</li> <li>VHR imagery with higher temporal resolution</li> </ul>	
Satellite Imagery Analytic Solutions	
<ul style="list-style-type: none"> <li>Object detection, Change detection, Site monitoring, Supply chains monitoring</li> <li>Insight for D&amp;I, Energy, Financial, GIS, and Manufacturing industries</li> <li>Customized solutions using AI and deep learning</li> </ul>	
Ground Station Services	
<ul style="list-style-type: none"> <li>Leasing ground stations for satellite operators and users</li> <li>Data transferring, Data processing, and Data delivery</li> </ul>	

# FEATURED SOLUTIONS

## Hybrid Solution

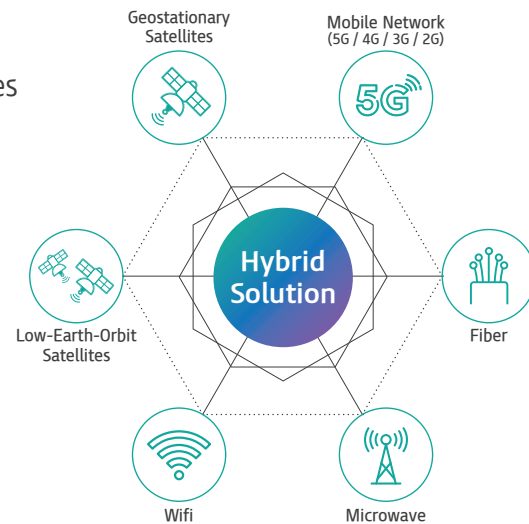

Complete integration of multiple networks with combined bandwidth and true seamless switchover.

### Key Features

- True seamlessness - traffic flows through multiple routes
- Aggregated transmission between different latency networks

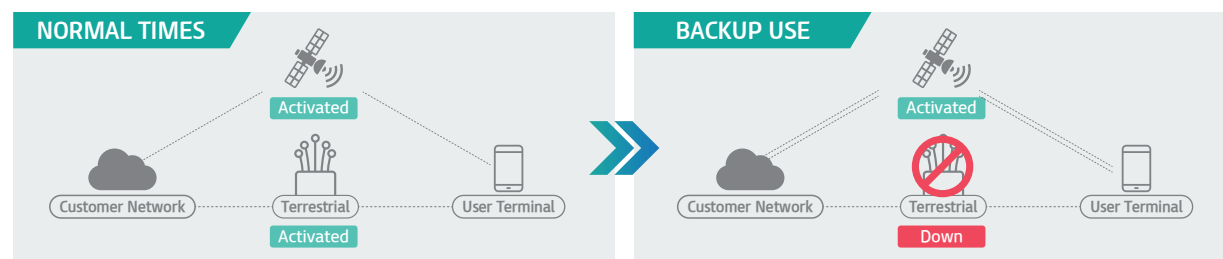

### Use Case Examples

- **5G + Satellite Mobile Backhaul:** enhanced service quality to minimize maintenance burdens
- **Mission Critical:** business continuity, real-time monitoring
- **Mobility:** merge of terrestrial + satellite by coverage availability
- **Multi-Orbit Service:** GEO + NGSO by application

### KT SAT Hybrid Solution

- Traffic is always flowing, causing no glitch
- Combined bandwidth allows more data on normal times

## EdgeCloud over Satellite

5G EdgeCloud in a lightweight hardware (Private 5G Core+MEC) is mounted on mobile vehicle and can offer private 5G connectivity and applications in order to provide wireless network / applications in areas where commercial networks are not reached or in a disaster zone.
